

# CBX™

## PRO OXIDIZER

liquid growth medium

organically based, biologically active, wastewater oxidizer

CBX ProOxidizer is a biochemical formulation scientifically designed to accelerate the oxidation of bio-solids in wastewater lagoons, digesters, sewer systems, percolation basins and spray fields.

**Directions:** Apply 1ppm to 6ppm per month of CBX ProOxidizer, depending on conditions, per month until achieving desired results, then continue at a maintenance rate of 1/2 ppm to 3ppm.

**Benefits include:** Bio-solids reduction, odor reduction, lower BOD due to bio-solid overload and improved settleability in clarifiers and increased decant volume in aerobic digesters. **Results also reported:** Increased dissolved oxygen concentrations, lower fecal coliform, lower BOD, reduced ammonia and reduced nitrates.

This product is inert & non-toxic. Information regarding the contents and levels of this product are available by calling +1.602.343.2995 (USA). **KEEP OUT OF REACH OF CHILDREN**

This product has been designed to restore nature's balance to create a better, healthier world. To find out more about CBX and our company, visit our website at [www.cbxproducts.com](http://www.cbxproducts.com).
